We Keep Bodies *In Motion.*™

Hand and Upper Extremity Care

Our hands, wrists and arms are involved in so much of what we do that injury or disease in them often has a major impact on our quality of life.

Drs. Heaps, Strapko and Wang are all subspecialty, fellowship-trained hand and upper extremity experts who have the experience and knowledge to properly diagnose and treat your condition. We are committed to getting you back to the activities you love.

On the other side of this page is a list of injuries and conditions we treat. We look forward to helping you.

How Can I Learn More?
