## COVID Screening Questions & Visit Information

Please review this document prior to your visit. The health and safety of our patients and staff is our number one priority.

1. Have you had a fever in the past several days/week?
2. Are you (or anyone in the home), experiencing any upper respiratory symptoms, such as cough, runny nose, or shortness of breath?
3. Have you had known exposure to anyone suspected to have or who has tested positive for COVID-19?
4. For your safety as well as the safety of other patients and staff members we strongly recommend that you wear a mask. If you, or the person with you, forgets a mask we will have one available.
5. We are limiting the number of people in our buildings by asking that our patients have a maximum of one person accompanying them.
6. Please be advised we are taking temperatures for each person that enters our office. Any person with a temperature of 99.5 or greater will not be permitted to enter.
